DETAILED FINDING

F-01: Cookie missing HttpOnly and Secure Flag

Risk: High

Description: Session cookies can be accessed by JavaScript and transmitted over HTTP

Impact: Session Hijacking, Account Takeover

Evidence: Fig 2, Fig 3

Recommendation: Set HttpOnly=true; Secure=true; SameSite=Lax in server response

CONCLUSION

Assessment Summary: Security testing of testasp.vulnweb.com (44.238.29.244) identified 8 vulnerabilities — 2 High, 3 Medium, 3 Low.

Critical Risks:

- 1. No HTTPS (Port 443 Closed) — HIGH:** All data travels in plain text, can be stolen.
- 2. Weak Session Cookies (No HttpOnly/Secure) — HIGH:** Allows session hijacking and account takeover.
- 3. Missing Security Headers — MEDIUM:** Site is vulnerable to clickjacking, XSS, and data leaks.

Recommendation: Enable HTTPS with a valid SSL certificate and enforce HttpOnly, Secure, SameSite and security headers (CSP, X-Frame-Options, HSTS, X-Content-Type-Options) in IIS 8.5 configuration. Estimated fix time: < 1 hour
